I am currently working as a lead (unofficial) developer in the Marvel project in Etiya. I am also one of the frontend core team member in the project. My tasks are to build application structures, decide on development standards, and review every pull request (code review) from my colleagues.

I mainly worked on telecommunication domain.

Also I am responsible for attending architectural meetings and mostly doing the complex UI integrations with backend services. Also worked with creating project UI-Kit (component design system) with Patternlab.

I also write articles at <https://medium.com/@denizguzel>

General:

- Javascript with latest ECMAScript
- Typescript

Front-end:

- Angular with NGXS or NGRX, RxJS
- SSR (Server Side Rendering) with Angular Universal
